# ABOUT AERON

---

- A pioneer in the Inertial Navigation technology, Aeron Systems was founded by Mr. Ashvani Shukla (B. Tech., IIT Kanpur) Mr. Abhijeet Bokil (B.E., MIT Pune) in the summer of 2008.
- Building deep-tech products in the field of Inertial Sensing and Internet of Things.
- Serving global customers in Aerospace, Automotive, Renewable Energy, Environment and Manufacturing sectors.

In over a decade's journey, Aeron with its innovative research, reliable products and diligent support, has become preferred choice of its customers. The products offered by Aeron are categorised in **two divisions**.

## Inertial Systems & Sensors

Navigate, control and stabilize your platform in aerospace, defense and automotive applications.

MEMS Inertial Navigation Systems and IMUs

FOG Inertial Navigation System

Airborne qualified AHRS

Digital magnetic compass

Tilt sensor and inclinometers

## Internet of Things

High reliability rugged data loggers and full package environment monitoring solutions

Wireless Data Logger and Gateway

Weather monitoring system for solar power plants, wind farm and agri

Air quality monitoring system

Water quality and Flood monitoring system

# SMART WATER QUALITY MONITORING SYSTEM

Aerial view of several circular aquaculture ponds in a body of water, with a small boat or structure in the center of one of the ponds.

• Aquaculture / Fish farming

Automate your farm and increase the yield!

Large industrial tanks at a sewage treatment plant, illuminated at night with warm lights.

Sewage Treatment Plant

Control foul smell, reuse water, comply with regulations

A wide river flowing through a lush, green forested landscape under a blue sky with scattered clouds.

River / Lake

Monitor pollution and save the environment!

Aerial view of a wastewater treatment plant with several large circular aeration tanks and surrounding infrastructure.

Effluent/Waste Treatment

Reuse water, reduce operational cost and comply with regulations

# WHAT IS SMART WATER QUALITY MONITORING SYSTEM?

The smart water quality monitoring system from Aeron called STREAM has mainly three components. 1) Sensors, 2) Smart Controller, 3) Cloud platform.

## SENSORS & PROBES

The sensors based on UV, Optical and other advance technologies measure the quality parameters of water and provide analog and digital signals.

## CONTROLLER

The smart controller is the heart of STREAM which connects with sensors and acquires signals, converts to digital and processes the values, applies algorithms and finally transmits to user through various means.

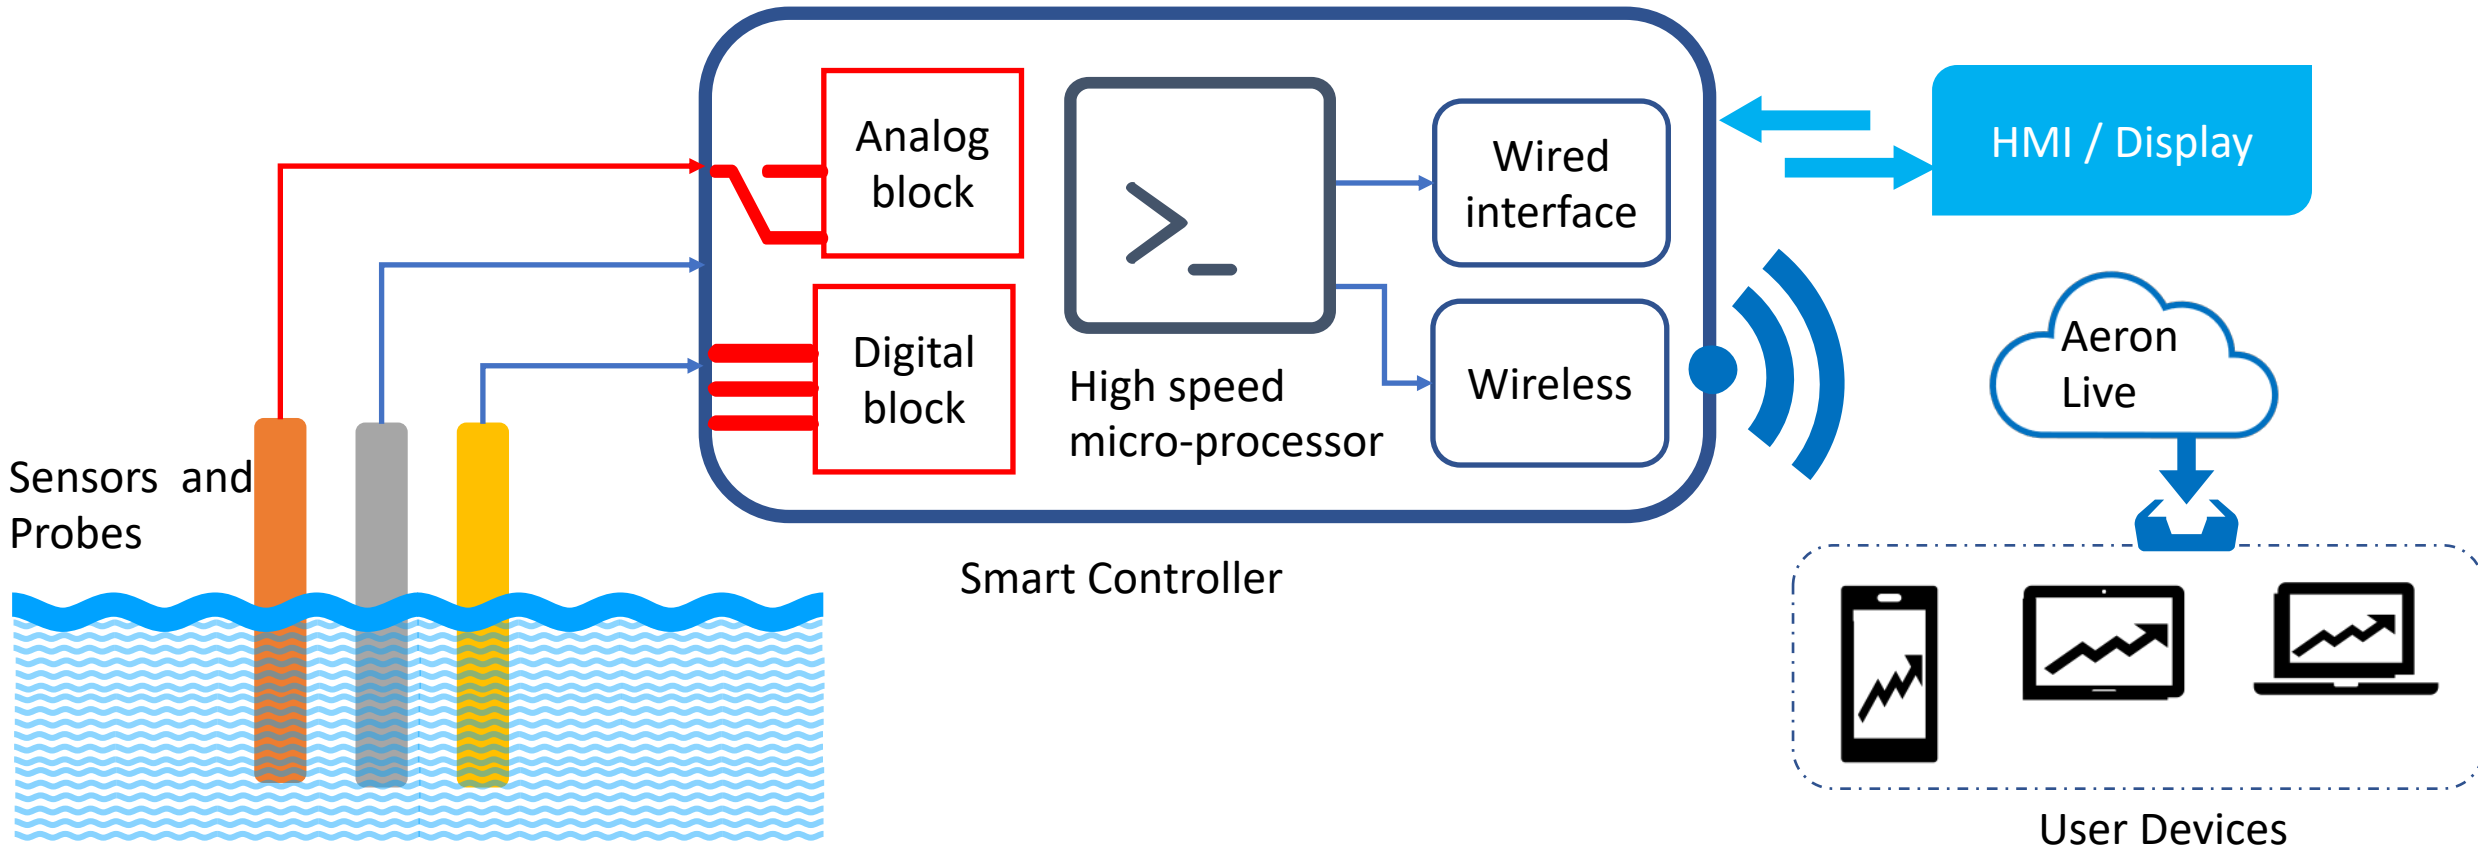

## CLOUD PLATFORM

The data received on cloud is analysed and shown to the user in meaningful values and graphs

# WORKING PRINCIPLE OF WATER QUALITY MONITORING SYSTEM

The block diagram below shows the basic working principle of water quality monitoring system from Aeron.

# KEY FEATURES OF SMART CONTROLLER

## HIGH PRECISION

With industry leading 24 bit ADC data is acquired precisely even for low voltage sensors.

## VERSATILE INPUTS

Various analog (0-5V, 0-1V, 0-20mV, 4-20mA), digital and serial inputs (RS232, RS485, MODBUS)

## GPS

Built-in GPS for precise time synchronization and location information

## COMMUNICATION

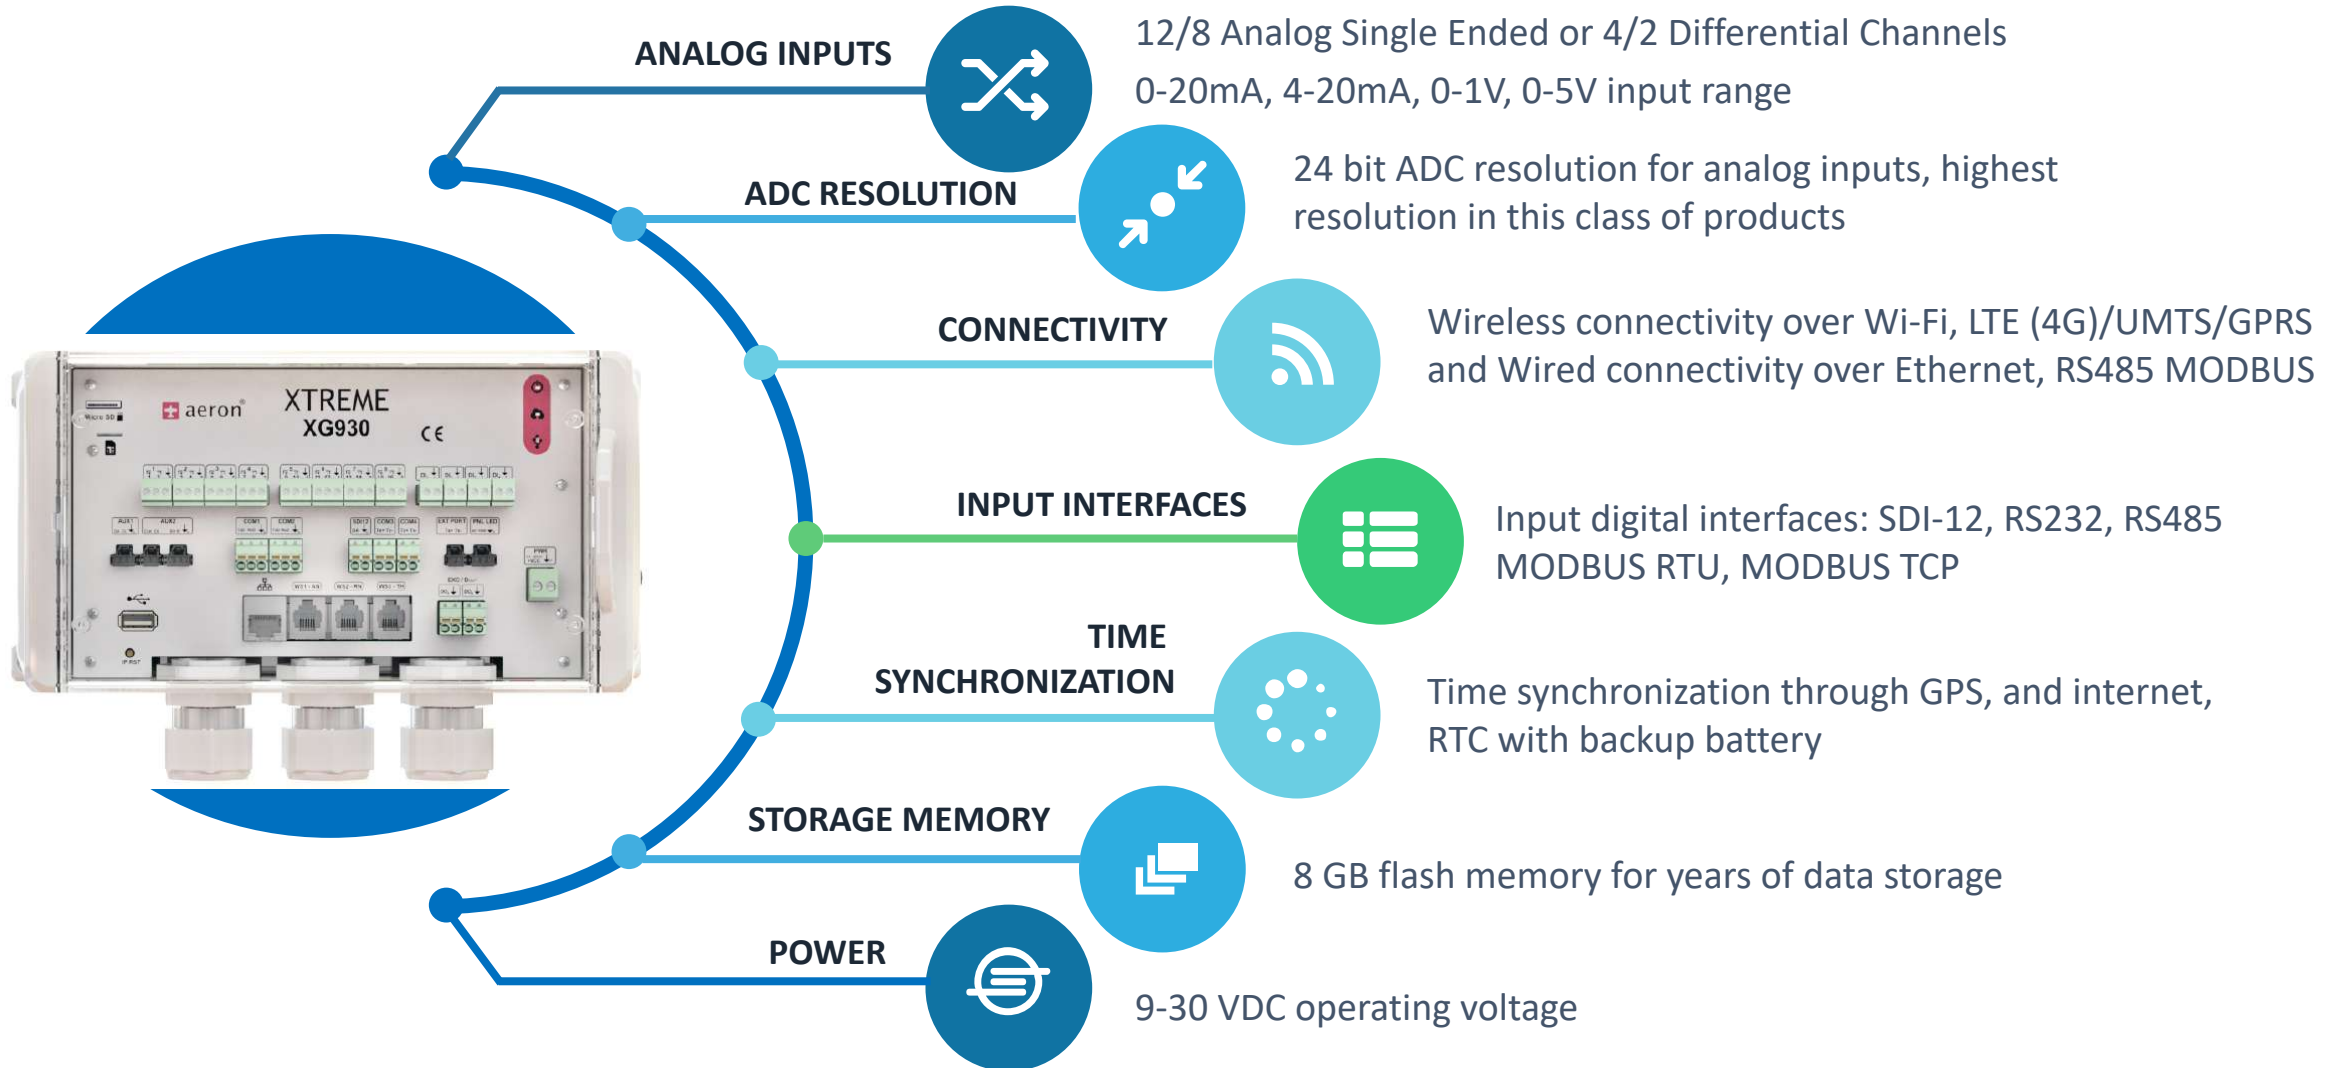

Wireless communication over 4G/LTE and Wi-Fi. Wired communication over Ethernet, RS485, MODBUS, RS232

## RUGGED

Weather protection, IP65, surge protection, 9-36VDC power, powered by solar panel as well as AC supply

# KEY SPECS OF SMART CONTROLLER

# SENSORS & PROBES

## STREAM

Aeron's STREAM series smart water quality monitoring system has wide range of latest optical and UV technology based sensors with fast response time, compact size and low maintenance.

pH	COD <sub>eq</sub>	BOD	TSS	ORP	DO
NH <sub>3</sub>	TOC	TDS	Conductivity	Fluoride	
Chloride	Sulphate	Turbidity	Alkalinity		
Ion Selective Electrode	Free Chlorine	Arsenic	Color		
Flow Rate	Hardness	Temperature	Oil & Grease		

# TYPICAL PARAMETERS MEASURED IN ETP AND STP

Following parameters are generally measured in the ETP and STP. Other parameters' measurement is also available with STREAM.

# STREAM

**pH** 0 – 14  
Combined electrode

**BOD** 0 – 1,000 ppm  
UV spectral absorption

**Turbidity** 0 – 1,000 FAU  
IR Nephelometry

**TSS** 0 – 3,700 ppm  
IR spectroscopy (870nm)

**COD<sub>eq</sub>** 0 – 10,000 ppm  
UV visible spectroscopy /  
UV-254 spectral absorption

**TOC** 0 – 1,000 ppm  
UV visible spectroscopy /  
UV-254 spectral absorption

**Flow Rate** 15 – 1200 mm  
EM Flow Meter

# TYPICAL PARAMETERS MEASURED IN WTP

Following parameters are generally measured in the WTP. Other parameters' measurement is also available with STREAM.

## STR<sub>AM</sub>

pH

0 – 14

Combined electrode

Chloride

0 – 200 ppm

Ion selective electrode

ORP

0 – 2,000 mv

Combined electrode

Hardness

0 – 1,000 ppm

Ion selective electrode

Conductivity

0.001 – 2,000 mS/cm

Amperometric with 4 electrodes

## STR AM

Following parameters are generally measured in the rivers and lakes. Other parameters' measurement is also available with STREAM.

pH

0 – 14

Combined electrode

DO

0 – 100 ppm

Optical / Galvanic

Chloride

0 – 200 ppm

Ion selective electrode

TSS

0 – 3,700 ppm

IR spectroscopy

Total  
Ammonical  
Nitrogen

0 – 100 ppm

Photometric

Sulphate

0 – 1,000 ppm

Ion selective electrode

Hardness

0 – 1,000 ppm

Ion selective electrode

Manganese

0 – 1,000 ppm

Ion selective electrode

Copper

0 – 2,000 ppm

Ion selective electrode

Conductivity

0.001 – 2,000 mS/cm

Amperometric with 4 electrodes

Zinc

0 – 1,000 ppm

Ion selective electrode

## STR AM

Following parameters are generally measured in the cooling tower. Other parameters' measurement is also available with STREAM.

pH

0 – 14

Combined electrode

Conductivity

0.001 – 2,000 mS/cm

Amperometric with 4 electrodes

ORP

0 – 2,000 mv

Combined electrode

TDS

0 – 2,000

UV spectral absorption

## STR $\approx$ AM

Following parameters are generally measured in the swimming pool. Other parameters' measurement is also available with STREAM.

pH

0 – 14

Combined electrode

ORP

0 – 2,000 mv

Combined electrode

# PRODUCT VARIANTS

## STR<sub>AM</sub>

*Aeron's smart water quality monitoring system is available in three versions suitable for different installation requirements.*

### Inline (I<sup>+</sup>)

Installed in bypass line, it is an easy option mostly for E/S/WTP, indoor as well as outdoor installation near the treatment plant.

### Submerged (S<sup>+</sup>)

When the monitoring is required in stored water, processing tank, pond and other submerged applications.

### Floating (F<sup>+</sup>)

Suitable option for aquaculture, river water quality, pond and other water bodies.

## STR<sub>≈</sub>AM

Wide range of communication options for variety of application requirements.

### Wi-Fi

When installed indoor, industrial area and even underground.

### Cellular (4G)

Best suitable for data collection from remote location.

### Ethernet

Places where Cellular or Wi-Fi wireless network is not feasible

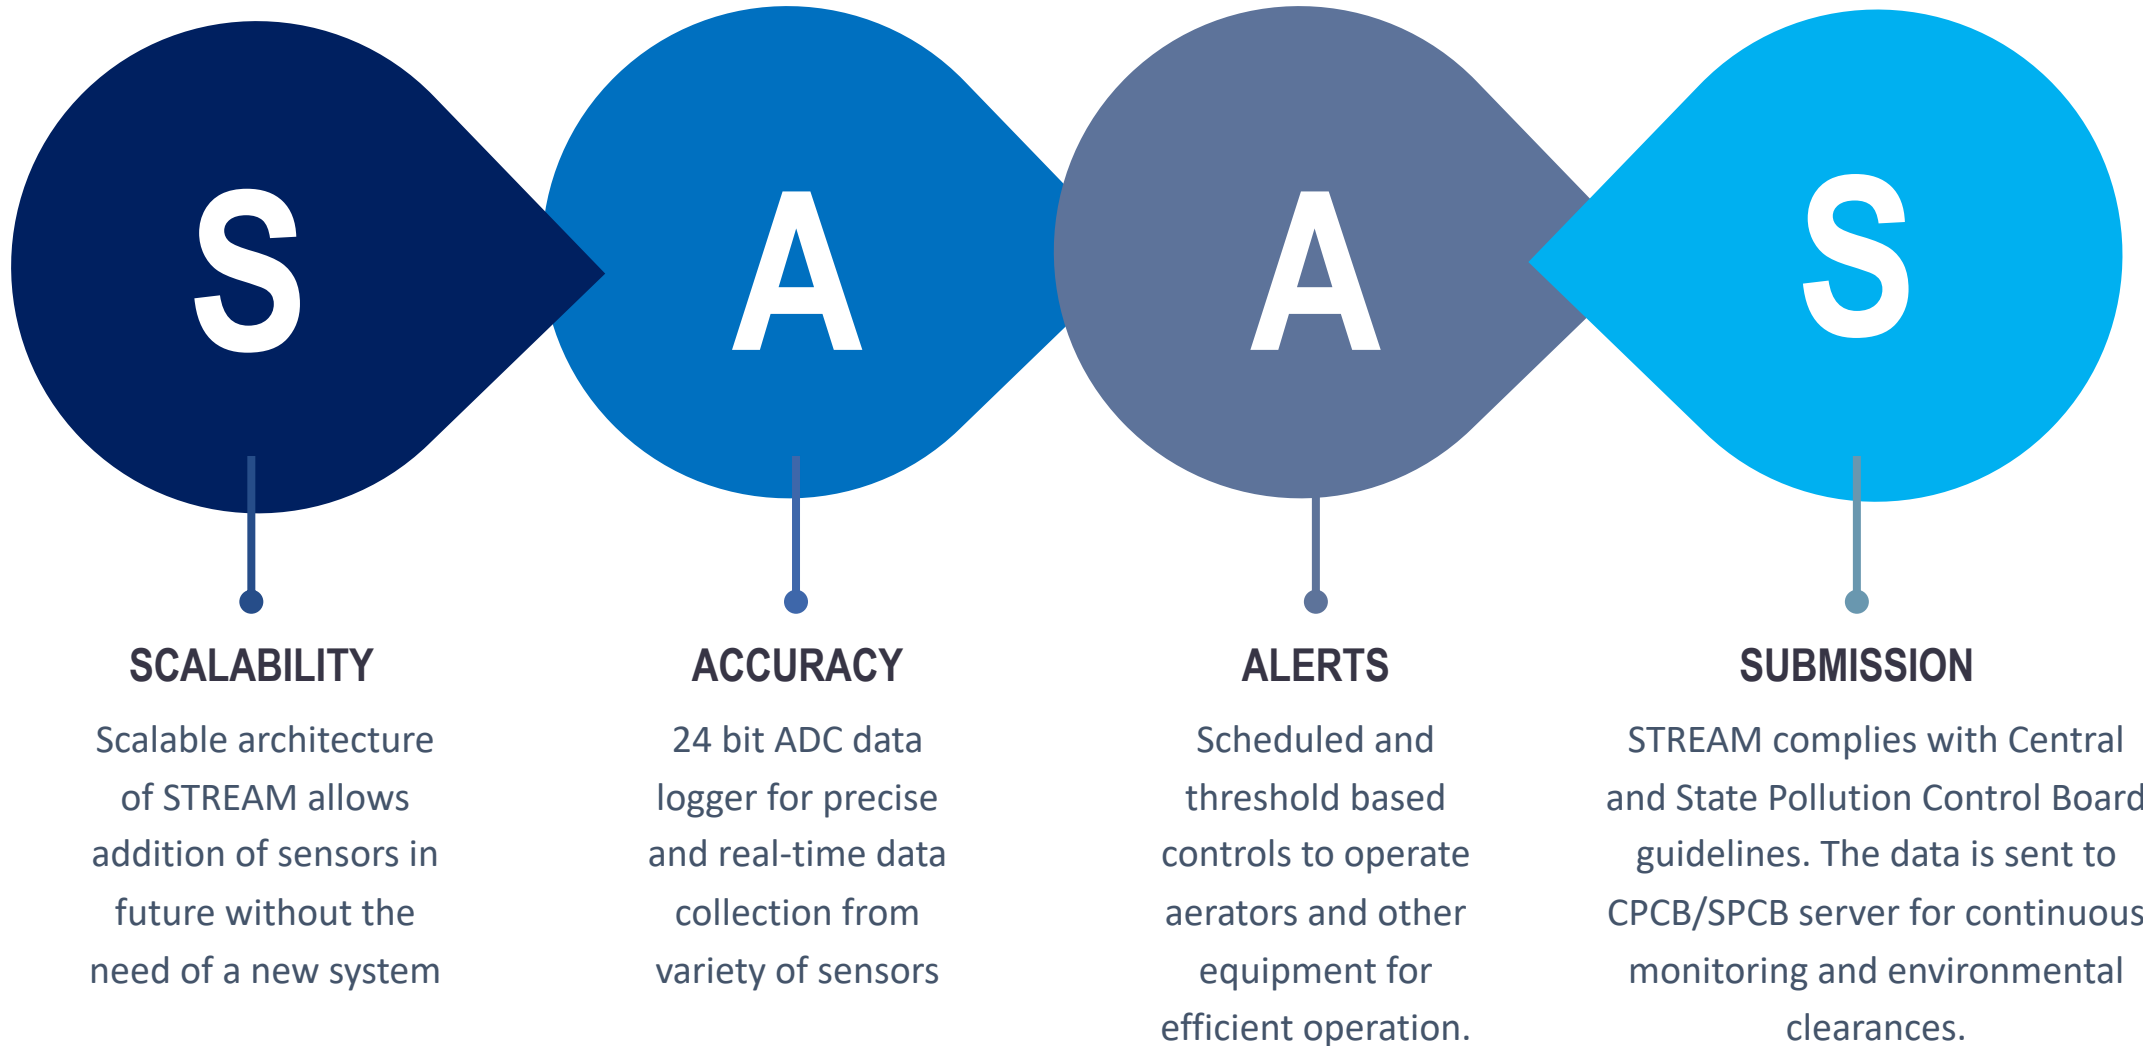

### RS485 MODBUS

When data is required to be given to PLC or RTU

# SPECIFIC ADVANTAGES OF AERON'S STREAM

# SENSOR TECHNOLOGY - BOD / COD / TSS

The COD and BOD values of treated water are critical parameters to verify that the treatment plant is working efficiently. Following block diagram shows the working principle of this sensor.

Main optical source is UV Absorption Spectroscopy – 254 nm  
Secondary optical source – visible LED 530 nm  
Auto cleaning mechanism

## WHY MONITOR WATER PARAMETERS?

*Oxygen depletion is the most common cause of fish deaths.*

*The Dissolved Oxygen (DO) concentration in aqua farm changes rapidly. Over a matter of hours, or sometimes even minutes, DO can change from optimum to lethal levels. No other critical environmental variable in fish culture is so dynamic.*

*Measure Ammonia to control the feeding (feed conversion ratio), look after growth and health.*

*Significant cost saving, increase yield per pond and reduce greenhouse gas emission.*

## WHAT ARE DESIRED VALUES?

	Fish / Fresh Water	Shrimp / Brackish Water
DO (mg/L)	5 ppm or above	5 ppm or above
Temperature (°C)	26-30 Deg C	25-30 Deg C
pH	6.5 to 8.5 < 4.0 - Acid death point 4.0 – 5.0 -No production 6.5 - 8.5 - Desirable range for fish production 8.5 - 11.0 - Slow growth > 11.0 - Alkaline death point	6.5 to 8.5 < 4.0 - Acid death point 4.0 – 5.0 -No production 6.5 - 8.5 - Desirable range for fish production 8.5 - 11.0 - Slow growth > 11.0 - Alkaline death point
Total Ammonia Nitrogen (ionized NH <sub>3</sub> + Unionized NH <sub>4</sub> )	<0-0.15 mg/l	0.05-0.4 mg/l
Nitrite	< 4.5 mg/L	< 0.125 mg/L

## STREAM

Following parameters are generally measured in the aquaculture and fish farming. Other parameters' measurement is also available with STREAM.

pH

0 – 14

Potentiometric

DO

0 – 50 ppm

Galvanic

Temperature

0 – 60 °C

Resistance thermometer

Total ammonia

0 – 20 ppm

UV spectroscopy

Nitrite

0 – 100 ppm

Ion selective electrode

## STREAM F+

### SMART CONTROLLER

High performance controller offering multiple communication options.

### SOLAR POWERED

Powered by solar, the system works 24x7 uninterrupted

Latest technology sensors with high reliability & accuracy

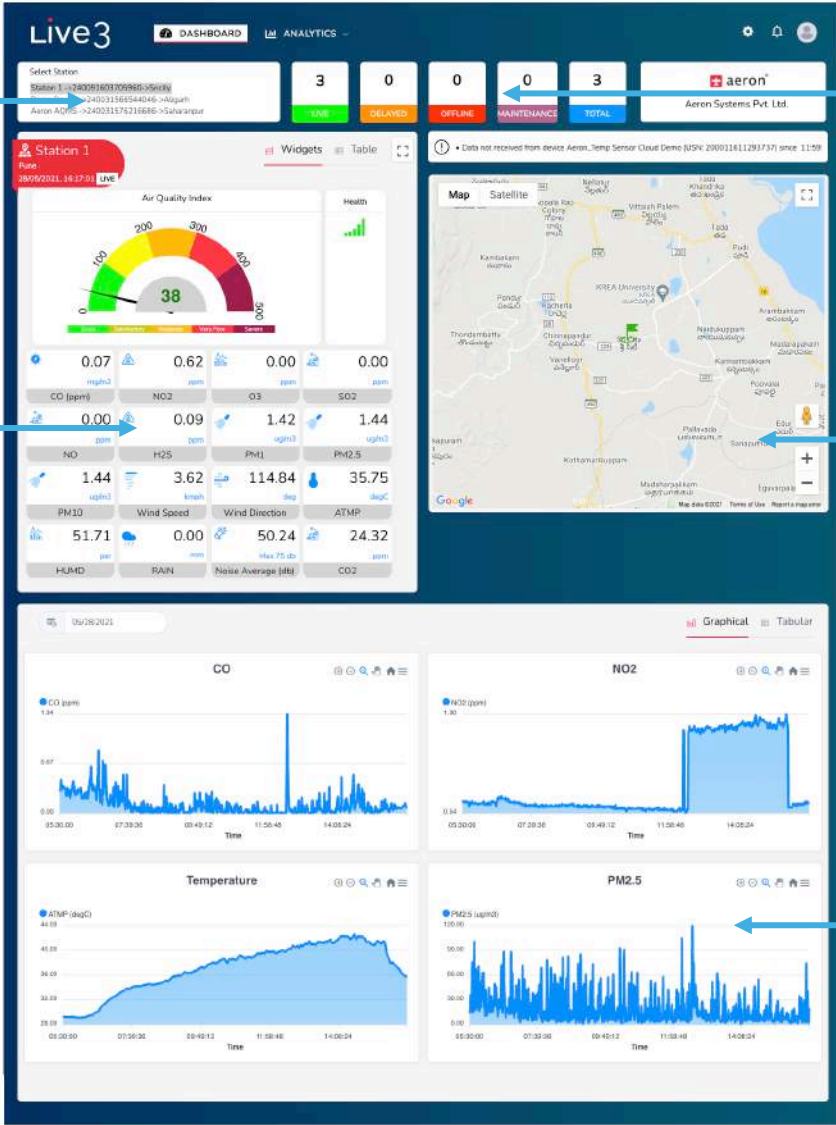

### SENSORS

Floating structure made from high quality material for long life

### FLOATING

# LIVE3 CLOUD SOFTWARE - DASHBOARD

**All Devices List**  
Quick list of all the devices you have access to

**Device Status**  
A quick view of the status of all your devices

**Widgets**  
The Live view of recent data from your device including the health

**Geo-Location**  
Map view showing geo-location of all the systems

**Graph View**  
Quick view of the parameters' trend over time for anomaly detection

# LIVE3 CLOUD SOFTWARE - DASHBOARD

**Quick Data View**  
Recent values listed along with threshold limits

**User Logo**  
User can add its logo and company name for personalized experience

**Notification Panel**  
All notifications at one place for easy view

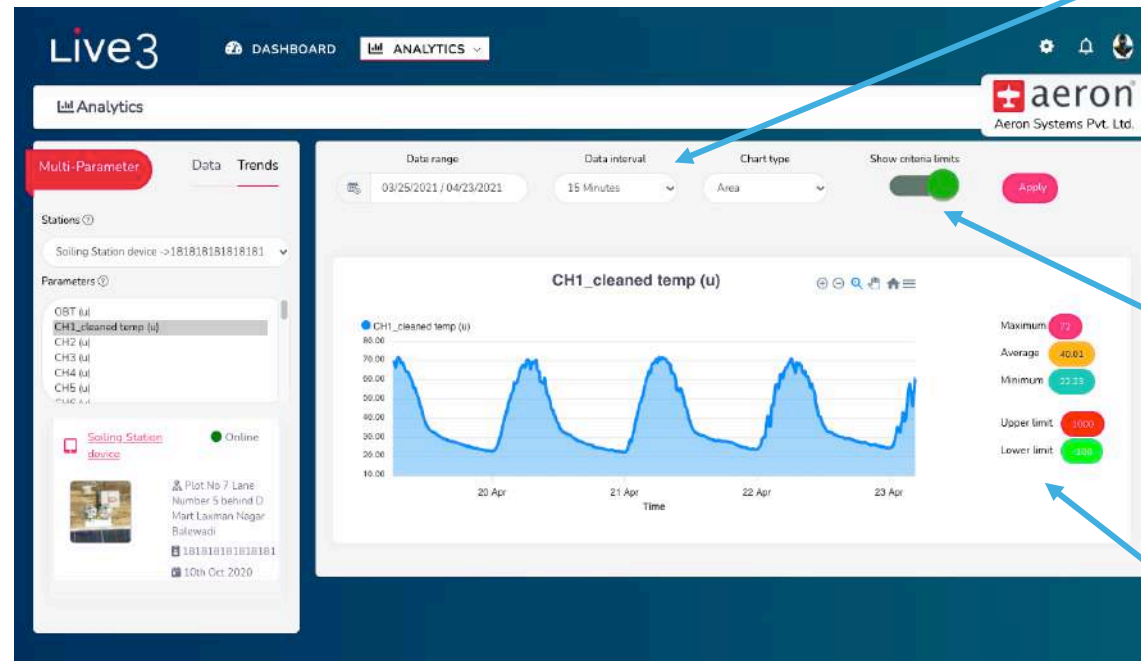

**Data Download**  
All the data visible in tabular form for user selected time period, downloadable in .CSV file format

## Multi Parameter

Generate graphs of single parameter or multiple parameters (upto 3) at the same time.

Analyze the trend over time, identify threshold breaches. The data analysis available for raw data, 15min, 30 min, 1 hr, 12 hrs, and 24 hrs.

User can select different data interval and chart type

Overlay threshold limits on the graph

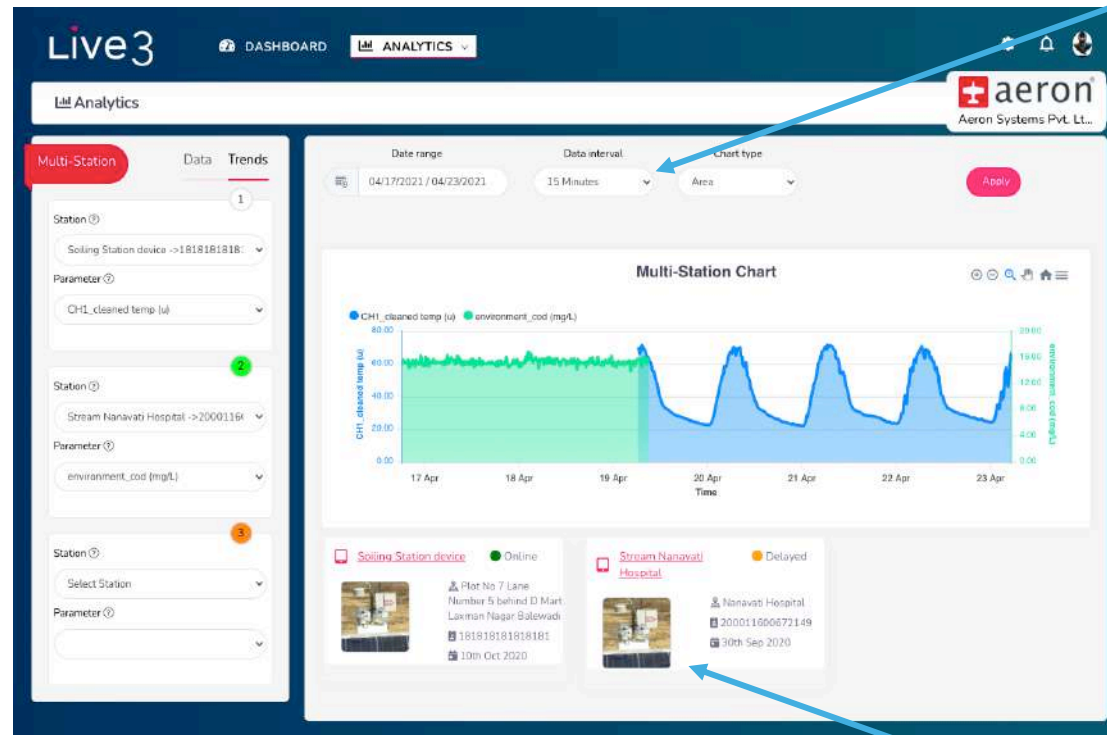

Identify maximum, minimum and average values from graphs

# LIVE3 CLOUD SOFTWARE - ANALYTICS

## Multi Station

Compare parameters from multiple systems, analyze the trend of a particular parameter from different locations.

User can select different data interval and chart type

Profile of the selected devices

## Multi Time

Analyze the trend of a particular parameter for two different intervals, like morning to evening, or day 1 to day 2.

Select two different time intervals

Overlay threshold limits on the graph

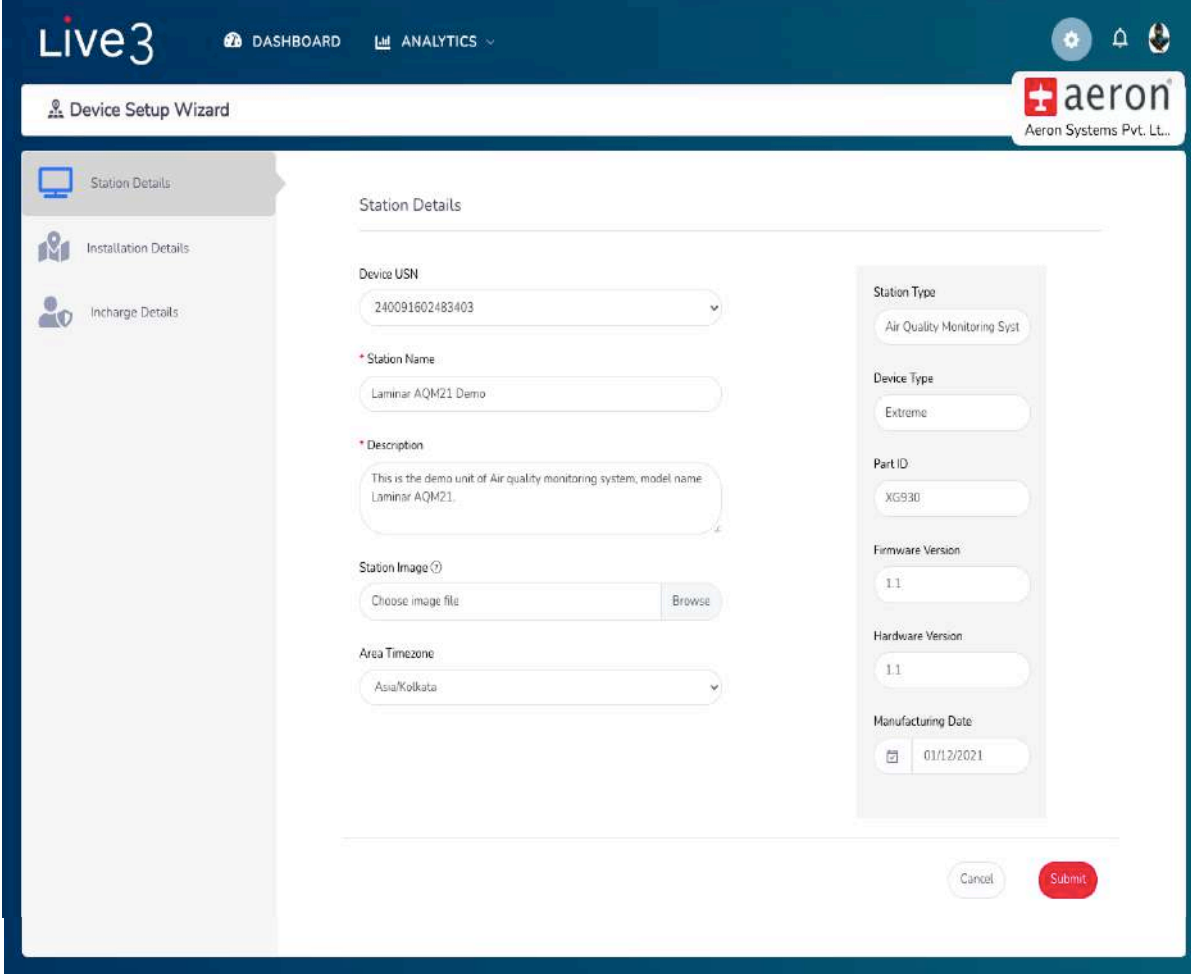

The configuration pages offer full control over your device

Give a unique identity to your device by creating device profile

Configure the parameters, manage what you want to see on Dashboard

Set the details of the site manager

Set alerts on parameters, set interval for reports and much more

The screenshot shows the 'Device Setup Wizard' interface in the Live3 application. The page is titled 'Device Setup Wizard' and features the 'aeron' logo in the top right corner. The main content area is divided into two columns. The left column contains a sidebar with three menu items: 'Station Details' (selected), 'Installation Details', and 'Incharge Details'. The right column contains the 'Station Details' form, which includes the following fields:

- Device USN:** A dropdown menu with the value '240091602483403'.
- \* Station Name:** A text input field with the value 'Laminar AQM21 Demo'.
- \* Description:** A text area with the value 'This is the demo unit of Air quality monitoring system, model name Laminar AQM21.'
- Station Image:** A file upload section with a 'Choose image file' button and a 'Browse' button.
- Area Timezone:** A dropdown menu with the value 'Asia/Kolkata'.
- Station Type:** A dropdown menu with the value 'Air Quality Monitoring Syst'.
- Device Type:** A dropdown menu with the value 'Extreme'.
- Part ID:** A text input field with the value 'XG930'.
- Firmware Version:** A text input field with the value '1.1'.
- Hardware Version:** A text input field with the value '1.1'.
- Manufacturing Date:** A date picker with the value '01/12/2021'.

At the bottom right of the form, there are two buttons: 'Cancel' and 'Submit'.

# LIVE3 CLOUD SOFTWARE - CONFIGURATION

## Dashboard Management

Manage the parameters you want to see on Dashboard

Define the parameters in widgets and graphs

## User Management

Manage your users, define rules for data access.

# ENVIRONMENT MONITORING PRODUCTS

Aeron offers a range of products for environmental monitoring.

## AIR

Real-time monitoring of air quality parameters for Smart City, Factory and Commercial Buildings.

## WATER

Online real-time monitoring of water quality parameters for Industries, Rivers, and aquaculture.

## SOLAR & WIND POWER

Real-time performance monitoring of Solar plants by measuring weather parameters.

## WEATHER

Measurement of weather parameters for research, forecast, and smart agriculture

## AGRICULTURE

Monitoring of soil temperature, moisture, weather for higher farm output & reduced irrigation cost.

## FLOOD

Monitor the potential flood situation and save loss of life and property.

## QUALITY YOU CAN TRUST

Inherited from defense electronics, Aeron offers highest quality product. With key systems made in India and certified to international standards, you can trust on Aeron for the quality product.

## SERVICE YOU CAN RELY ON

Serving customers for over a decade with exceptional service standards you can rely on for your critical requirements.

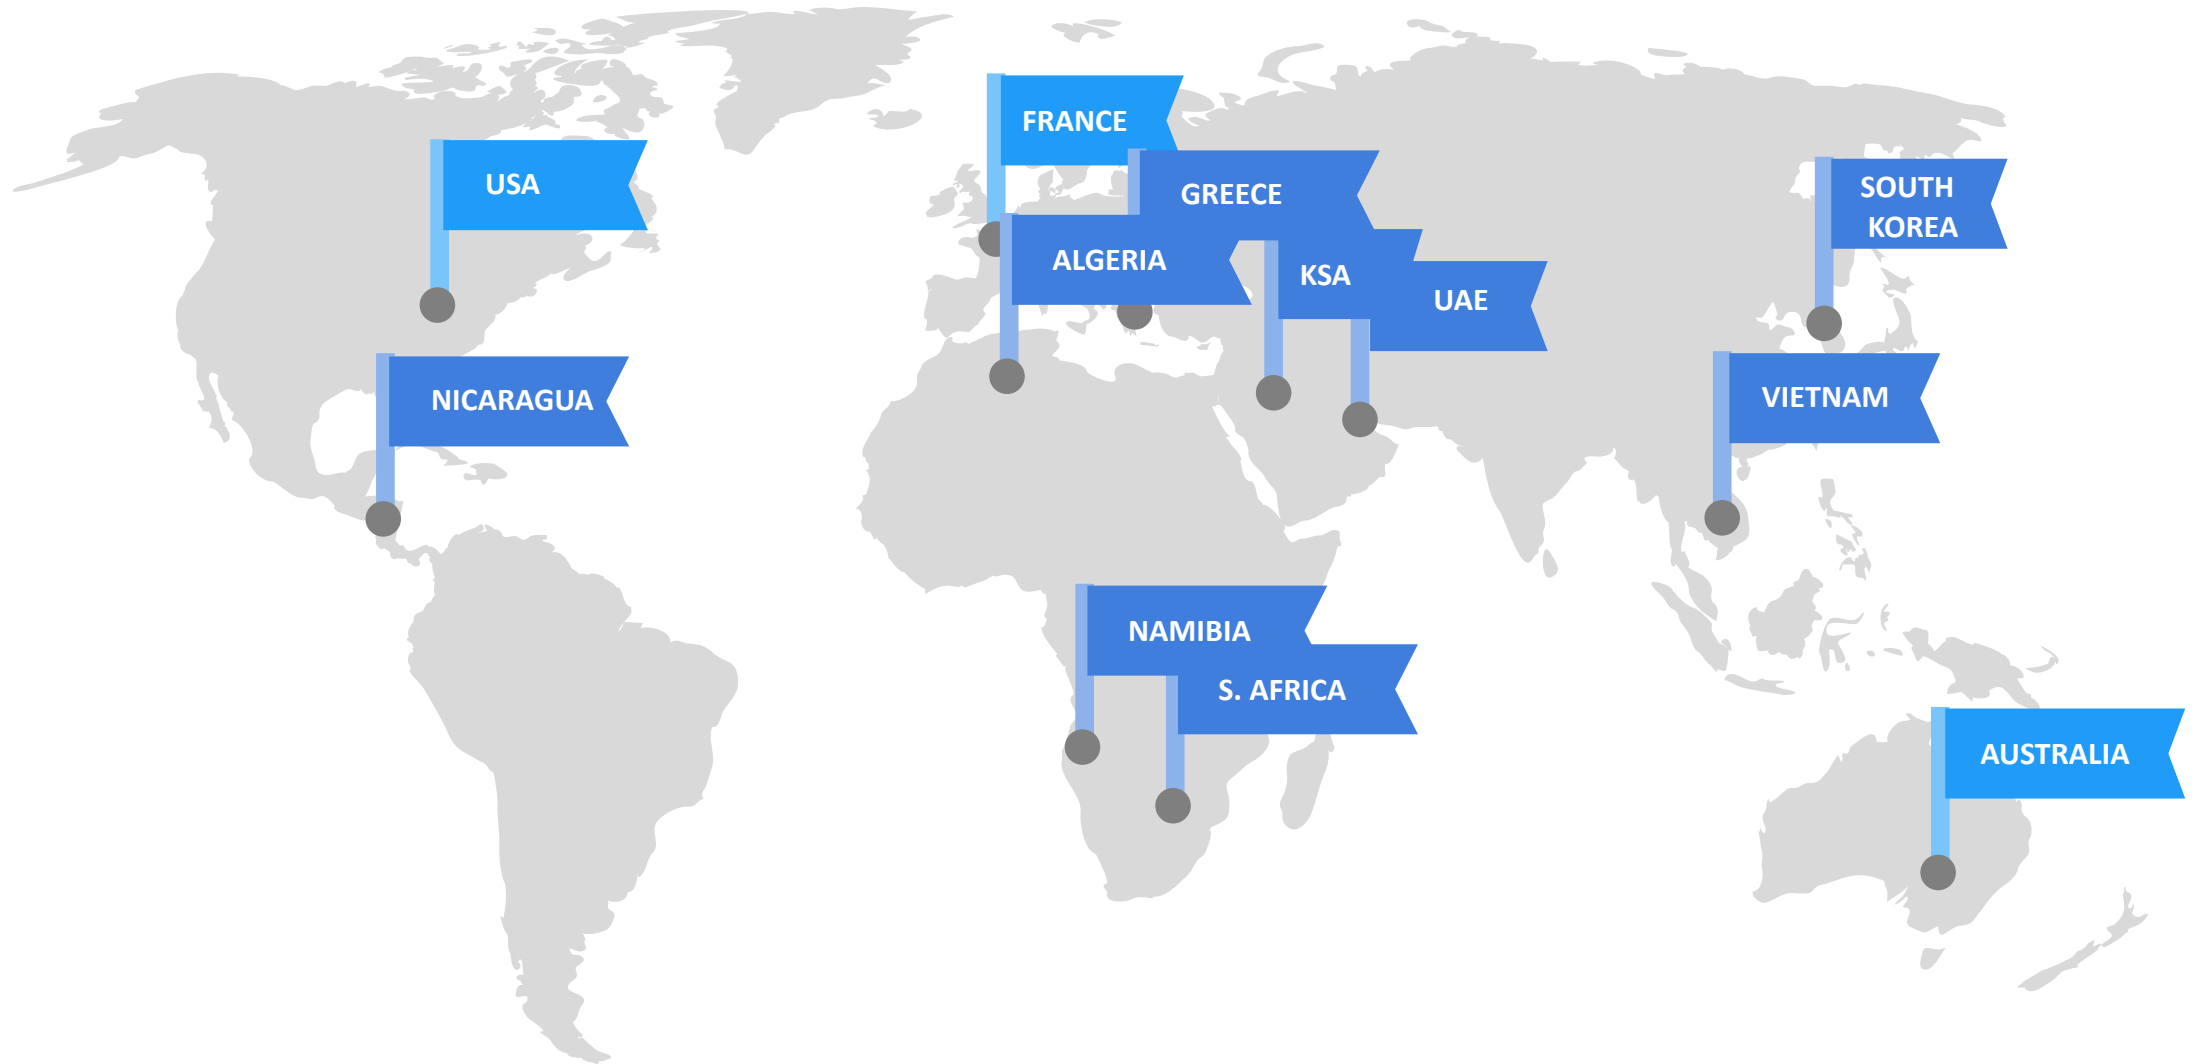

## TECHNOLOGY YOU ASPIRE FOR

The latest IoT and sensor technology is the next big trend in the world, and Aeron is at the forefront of technology development.

## PRICES WITHIN YOUR BUDGET

The value optimization is the key mantra for low prices with high quality. Our product prices remain within your budget.

# GLOBAL DISTRIBUTOR PARTNERS

# PRODUCTION & TESTING FACILITY

*The production and testing facility certified as per ISO9001-2015 has climatic chamber, rate table and advance equipment for product assembly and testing.*

# DESIGN & DEVELOPMENT FACILITY

*Well equipped design and development facility with tools to develop high speed military grade electronics, software and mechanical systems.*

# WORK CULTURE AT AERON

# THANK YOU!
